Deprenyl is well known to boost brain levels of dopamine by inhibiting monoamine oxidase-b (MAO-B). The stylish height of this expansion is illustrated by the Art Nouveau houses built by Victor Horta. Not really a bad logo and it blends into the on-air graphics without calling much attention to itself. A 61 year old female on metformin, gliclazide, frusemide, quinapril and candesartan-hydrochlorothiazide.
